Updated Interactive Map Provides Legislators with School Information

The Tennessee Comptroller's Office has created new and updated interactive maps featuring a wide range of education data at the school and school district levels.

The maps illustrate the Tennessee House of Representatives and Senate legislative districts overlaid with school district and school level information. The legislative profile maps are both clickable and searchable. A user can search by legislator, school district, and school name.

The maps include demographic information, and accountability, performance and financial data. Some specific data points include the number and type of schools (e.g., traditional, charter, private, etc.), school designation, average ACT score, per-pupil expenditure by average daily membership, and average classroom teacher salary.

The maps can be found at <http://www.comptroller.tn.gov/OREA/MappingTN>

"We hope this online resource will be helpful to Tennessee legislators who are charged with making important decisions that impact our public schools," said Comptroller Justin P. Wilson. "We also believe Tennessee citizens and media will find this information useful and informative."
